A Guide to Health Sciences, Medical and Nursing Information: Getting Started

databases, web resources, statistics and print resources for Nursing, health sciences, medicine, bioinformatics

Search the Libraries’ databases for articles.

Some databases will provide the full text or entire article online.

If the full text is not available from the database you’re searching, look for GET IT or the “Get it (UWM Libraries)” link.

Research Tips and Tricks

- Research Tools for PubMed and Beyond

Core Health Sciences Databases

- PubMed (Medline)
  - Indexes over 5,000 journals in medicine, nursing, and other health sciences. PubMed is the National Library of Medicine’s search service that provides access to over 21 million citations in MEDLINE, with links to participating online journals.

Notable Books

Library Workshops and Tours “By Request”

We offer a variety of instructional services by request. By Request Workshops and Tours may be requested by UWM faculty, staff, and students. You can request a workshop for yourself or for a group. Workshops are normally scheduled in the Golda Meir Library, but some workshops may be delivered on-site at your group meeting, classroom, or residence hall.

Contact Kate L. Ganski, Library Instruction Coordinator, for details.

Course Instructors: To bring your class to the library for instruction, see the Course Integrated Instruction page.

Researchers and Students: To request one-on-one help with your research, please complete form.

Walking Tour of the UWM Libraries

Customized walking tours highlighting any and all of the array of collections and services at the request. Tours range from 20 minutes to one hour.
